DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 1, 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 8, 9 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/37697 to Rau et al.

Rau discloses a device comprising a micro axial pump fastened to a catheter (13) and having a tubular pump portion (14) comprising a pump ring (15) and a tubular cannula (25) with a distal axial inlet and a proximal radial outlet (16); and a dilating device (20a) surrounding the pump portion.

Regarding the limitation "wherein said dilating device is configured for breaking up a stenosis of a cardiac valve upon deployment while positioned within said cardiac valve", Rau discloses a balloon as a dilating device. There appears to be no structural difference between applicant's claimed device and Rau's disclosed device. The device of Rau is capable of opening up a stenosed valve.

Application/Control Number: 09/890,778 Page 3

Art Unit: 3731

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 10, 11, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/37697 to Rau et al. in view of U.S. Patent No. 4,808,165 to Carr.

Rau discloses the claimed invention except for the particular pressure to which the balloon may be inflated. Carr teaches that a balloon may be inflated to at least 1.0 bar in order to be able to inflate within a stenosed valve. These high pressures are necessary to open the stenosed valve (Column 1 lines 34-40). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Rau with the high inflation pressure of Carr in order to allow the device of Rau to dilate a stenosed valve.

Response to Arguments

6. Applicant's arguments with respect to claims 8, 9 and 19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica R Baxter whose telephone number is 703-305-4069. The examiner can normally be reached on M-F 8:30AM - 5:00PM.

Art Unit: 3731

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, McDermott or Shaver can be reached on 703-308-0858. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
